the machinery for processing shea nuts into shea butter

Démonstration of the machinery

The construction of this building was made possible thanks to the generous donation of Mrs. Wilhelmine and Mr. Joseph Kämmerling.

We thank them from the bottom of our hearts for their support. We would also like to thank our construction team for their active involvement. We wish the women of the village all the best and much success in their work, which can be carried out in this building whatever the weather or the state of the daylight might be.

The members of the NPO „Actions de Solidarité“
