

Honorine had been born healthy. At 4, she had malaria. The parents were too poor to go to a proper hospital. A nurse's assistant gave the child an injection that she placed wrongly. Honorine could not get up after that. How she learned to walk later, is a miracle. Together with the German NPO "Help-Wir helfen", the operation was financed. The result is like a miracle:

Honorine's home

Honorine at school

Honorine after the surgery

first attempts to stand up

Honorine dances

Honorine strains Bijou
