

Ms. Longan came to our office with a big ulcer on the left side of her face. She was in intense pain. We immediately sent her to the hospital at Zinvie. She was lucky that doctors from France came to the hospital for operations shortly afterwards. Ms. Longan was operated on immediately. The eye was saved, but unfortunately, the autopsy of the ulcer revealed cancer. She now has to undergo chemotherapy. Let's pray that the life of this mother of 7 children will be saved for her children.
